The increasing population and the urbanization cause worsening the riparian environment world-wide countries recently. Under the circumstance, many studies and activities in river restoration are being carried out to solve the issues riparian environment in the world. In the 4th World Water Forum in 2006, the representative of Asian countries discussed and agreed the importance of sharing intelligence with partners of Asian countries to improve on river and watershed restoration. To leading the activities of sharing knowledge, China, Korea and Japan established the "Asian River Restoration Network (ARRN)" in November 2006. ARRN holds "The 6th International Forum on Waterfront and Watershed Restoration" as a joint event of "The 5th International Workshop on River Environment" in Seoul, Korea.
